

## QUALITY POLICY

Mission of SLIMEC is focus on “lasting success” by strategy and actions to ensure the “going concern”:

**MISSION: be bearers of solutions for the production of precision mechanical components;**

**VISION: be an ideal partner in terms of continuity, reliability, timeliness, quality and items development.**

**VALUES: confidence, effectiveness, results, respect of people, utmost attention to safety and environmental friendliness.**

To conquer commercial competition is basic a mix of valued characteristics for Customer: Quality Product, Technical competence, Competitive prices, Flexibility and High level of service.

Those characteristics are typical of SLIMEC’s production obtain by mix “Italy production – production and purchasing Overseas”.

Company Management System (Quality, Health & Safety, Environment, Management review) it’s means to keep under control the process and following targets according to Management instruction:

- *Active participation of all staff to achievement Management System.*
- *Discussion with customer in order to be head of time needed and get value.*
- *Continuous research and attend in the market to get development opportunities, with high focus to the marginality and financial risks.*
- *Growth of human resources to fully reach partnership with company Ouyimec (increasing of production capacity, warehouse management stock/shipment from suppliers, quality checking, integrated information technology Italy/Overseas) for a business management more efficient and profitable.*
- *Development of everyone role awareness to reach company and self targets.*

To ensure a sustainable future to all stakeholders (Employee, Management, Company), Management support organization and technological growth so that SLIMEC can work with:

- High management reactivity to quick reply to the market fluctuations and high flexibility, effectiveness, efficiency and control skills of production structure and of supply chain;
- Growth Workshop’s margins through an accurate checking of all production management activities;
- Continue monitoring of quality of Overseas supplies, of warehouse stocks in our factory and reduction time of financial cycle “purchase-sale”;
- Efficiency management and support process (Quality Checking, Logistics, Warehouse) in order to give an active contribution to the “creation of value”.

Leadership agrees to spread out knowledge of quality policy, of strategy, of annual target and make available resources to reach that in all the company.

*Chief Executive Officer*
